Beim Neustart sucht Maxtor EasyManage nach Shared-Storage-Festplatten in Ihrem Netzwerk. Wenn Shared-Storage-Festplatten gefunden werden, werden die Netzwerk-id sowie dies IP-Adresse der gefundenen Festplatte (n) angezeigt. Beispiel: MSS-000338 (192.168.0.5). Hinweis: Waterfall eine Meldung angezeigt wird, dass keine Shared-Storage-Festplatten gefunden wurden, klicken sie auf die Schaltflcheer klicken, um weitere informationen und einen Link zu fehlerbebungstipps anzuzeigen. Home Reviews Maxtor General Storage II 1TB Trusted Reviews can earn an affiliate commission when buying by linking to our website. Find out more Dave Mitchell (en) March 5, 2020 2:33pm GMT can now be sponsored by the mighty Seagate, but that hasn't stopped Maxtor continuing to develop its desktop small business line NAS Appliances. Since the company's acquisition in May this year, Seagate has decided to keep the Maxtor brand, using it to deliver low-cost personal and small storage and differentiate it from Seagate's own high performance hard drives. The latest Maxtor Shared Storage II 1TB is at the top of the family's general storage and aims to provide RAID with a secure storage network for home users and small offices along with automated backup tools. If there is one thing Maxtor is doing well it is the build quality. This chunky device is very well manufactured. The hard plastic shell feels very sturdy and the side panels are covered with rubber panels that also stop the unit sliding around on the desktop. Another advantage is that they absorb any vibrations, making the device very quiet during operations. A small internal fan is installed at the back, but it doesn't make any noticeable noise either. You get one Gigabit Ethernet port at the back along with a pair of USB 2.0 ports that can be used to connect additional storage or printers over the network. Maxtor's EasyManage utility get up and running by searching the network for the appliances and displaying them ready for choice. You don't need to approach the web browser management interface to set up your user account because you can create them from EasyManage. Just type in your username and password and it will create a bunch of public and private folders on your device and add a desktop icon for you. A common feature of all General Storage products is that multiple folders are automatically created to store documents, web pages, music, software, and photos. The Maxtors Drag and Sort tool connects with them as and deleting the folder on the desktop icon automatically scans the files and places them in the appropriate folder based on their file extension. If you want to be a business business Additional folders for spreadsheets, multimedia files and projects are also being created. With multiple user accounts, you can use EasyManage to change from one to the other, and it will automatically dismantle the current drive, mount a new one, and change the desktop icon to reflect that. Any folders that are reset to the icon will always go to the user's current location on the device. Automated backup tools are well represented and worked well during testing. From EasyManage you select files and folders that will be included and decide which days of the week you want it to work and at what time. The background process available from the icon in System Tray provides quick access to work with certain on-demand backup jobs and to be overridden to another account. SimpleView provides complete backup status, and a useful feature is to decide how many files you want to save. When USB storage devices are connected they are advertised as public offerings available to all, but read only access can be installed if you want. When the device is connected, it is automatically recognized and made available as a public promotion, which can then be displayed on a local disk email. Please note that the device only supports FAT32 sections on USB devices. Extended settings can be changed from the device's web management interface, which opens with a master to set up time zone, administrative access restrictions, and team membership. A pair of 500GB default RAID-0 hard drives covers 1TB volume, but if you can afford fifty percent loss of storage space you can request a RAID-1 IF you want. However, if the mirror drive fails and needs to be replaced, you will have to break the warranty on the back to gain access. We also found that the power management setup to place the drive in sleep mode does not work with these dual-drive models and can only be used with attached USB storage devices. The Gigabit Ethernet port makes its presence felt for overall performance with a simple drag and sort copy of the 690MB video file from the Supermicro 3.2 GHz Pentium D workstation taking 48 seconds for an average recording speed of 14.4 MB/sec. Copying the file back to the workstation delivered an average reading speed of 19.2MB/sec. Tests conducted on Infrant Technologies ReadyNAS NV and Thcus N5200 RouStor returned a reading speed of 12.3 MB/sec and 14 MB/sec respectively and 25 MB/sec and 26.6 MB/sec reading speed. Maxtor's newest NAS combines superior build quality, extreme ease of use, and a reasonable level of capability, including automatic backup. However, The entry-level NAS appliance market is really heating up, and the Shared Storage II 1TB is on the expensive side - especially when you can get the Buffalo Technology TeraStation Pro 1.0 TB, which provides a lot more room for your money, just for a small amount of extra cash. EasyManage EasyManage Easy installation work and automates the creation of a user account and folder. -- Advanced settings are available from the web interface where you can decide how your hard drives will be used. -- Please note that power management and sleep timers cannot be used on Maxtor dual-drive devices. -- SimpleView provides a useful log of all the user's backup tasks and status. --Automated backup tools are easy to set up and use, and you can maintain file history. -- Unlike other sites, we thoroughly test every product we review. We use industry standard tests to properly compare features. We will always tell you what we find. We never, ever take money to review a product. Tell us what you think - send your letters to the editor. No Fee Assessment/No Attempted Fees Free Score and Free External Hard Drive with every successful recovery. You pay nothing if your data cannot be recovered. Call now for a free quote: 1-800-717-8974. ACS Data Recovery specializes in Maxtor hard drives and can successfully recover on any Maxtor hard drive, including Maxtor external hard drives. If you have a crashed Maxtor hard drive, please call us today to get a quote: 1-800-717-8974 or just fill out our online request form, pack the drive and send it to us for evaluation. We never charge an evacuation fee on standard IDE hard drives, and there is no charge if your hard drive is not repaired. A common problem with Maxtor hard drives, particularly 20GB, 30GB and 40GB models, is damage to the system area. Many times this type of failure will manifest itself with a hard drive fail bug, and the bios drive will simply be treated like N40P. The N40P is a common family of 40GB hard drives, and they are particularly prone to corrupt the area of the system. The area of the system is similar to the operating system for the hard drive, and it controls how the hard drive reads and writes the data. With highly specialized equipment, we can work at the system level of any drive, and we can fix many of the problems that arise. Once we can repair the damaged modules in the system, we can begin to recover data from your disk. We can provide data recovery on any size or model of the Maxtor hard drive, including: Maxtor DiamondMax Plus 8 6K040L0 40GB 7200 RPM Ultra ATA133 Maxtor DiamondMax Plus 8 6E040L0 40GB 7200 RPM IDE Ultra ATA133 Maxtor DiamondMax 8s 6E040T0 40GB 7200 RPM Serial ATA15 Maxtor DiamondMax 10 6L080P0 80GB 7200 OB/min IDE Ultra ATA133 Maxtor DiamondMax Plus 9 6Y080L0 80GB 7200 OB/min IDE Ultra ATA133 Maxtor DiamondMax 10 6L120P0 120GB 7200 OBМ IDE Ultra ATA133 Maxtor DiamondMax 10 6L160P0 160GB 7200 OB/мин IDE Ultra ATA133 Maxtor DiamondMax Plus 9 6Y120P0 120GB 7200 OB/мин IDE Ultra ATA133 Maxtor DiamondMax 10 6L160M0 160GB 7200 ОБМ Серийный ATA150 ATA150 DiamondMax 10 6L200M0 200GB 7200 RPM Serial ATA150 Maxtor DiamondMax 10 6V160E0 160GB 7200 RPM SATA 3.0Gb/s Maxtor DiamondMax Plus 9 6Y250M0 250GB 7200 RPM Serial ATA150 Maxtor MaxLine Plus II 7Y250M0 250GB 7200 RPM Serial ATA150 Maxtor DiamondMax 10 6L250R0 250GB 7200 RPM IDE Ultra ATA133 Maxtor DiamondMax 10 6V200E0 200GB 7200 RPM SATA 3.0Gb/s Maxtor DiamondMax 10 6V200E0 200GB 7200 RPM SATA 3.0Gb/s Maxtor MaxLine Plus III 7B250R0 250GB 7200 RPM IDE Ultra ATA133 Maxtor MaxLine Plus III 7L250R0 250GB 7200 RPM IDE Ultra ATA133 Maxtor MaxLine Plus III 7L250S0 250GB 7200 RPM Serial ATA150 Maxtor DiamondMax 10 6L250S0 250GB 7200 RPM Serial ATA150 Maxtor DiamondMax 10 6V300F0 300GB 7200 RPM SATA Maxtor DiamondMax 10 6L300S0 300GB 7200 RPM Serial ATA150 Maxtor MaxLine Plus III 7L300R0 300GB 7200 RPM IDE Ultra ATA133 Maxtor DiamondMax 10 6V320F0 320GB 7200 RPM SATA 3.0Gb/s Maxtor MaxLine Pro 500 7H500R0 500GB 7200 RPM IDE Ultra ATA133 Maxtor OneTouch III F01E200 200GB 7200 RPM External Hard Drive Maxtor OneTouch III F01A200 200GB 7200 RPM External Hard Drive Maxtor OneTouch III F01H300 300GB 7200 RPM External Hard Drive Maxtor Shared Storage H01P200 200GB 7200 RPM Network Storage Drive Maxtor DiamondMax 11 6H400F0 400GB 7200 RPM Maxtor Atlas 15K II 8K036L0 36.7GB 15,000 RPM SCSI Ultra320 68pin Maxtor Atlas 15K II 8K036J0 36.7GB 15,000 RPM SCSI Ultra320 80pin Maxtor Atlas 10K V 8J073L0 74GB 10,000 RPM SCSI Ultra320 68pin Maxtor Atlas 10K V 8J073J0 74GB 10,000 RPM SCSI Ultra320 80pin Maxtor Atlas 15K II SAS 8K036S0 36.7GB 15,000 RPM Serial Attached SCSI (SAS) Maxtor Shared Storage H01R300 300GB 7200 RPM Network Storage Drive Maxtor OneTouch III F01H500 500GB 7200 RPM External Hard Drive Maxtor DiamondMax 11 6H500F0 500GB 7200 RPM SATA 3.0Gb/s Maxtor DiamondMax 11 6H500R0 500GB 7200 RPM IDE Ultra ATA133 Maxtor MaxLine Pro 500 7H500F0 500GB 7200 RPM SATA 3.0Gb/s Maxtor MaxLine Pro 500 7H500R0 500GB 7200 RPM IDE Ultra ATA133 Maxtor Atlas 15K II 8K073L0 74GB 15,000 RPM SCSI Ultra320 68pin Maxtor Atlas 15K II 8K073J0 74GB 15,000 RPM SCSI Ultra320 80pin Maxtor Atlas 10K V 8J147J0 147GB 10,000 RPM SCSI Ultra320 80pin Maxtor OneTouch III G01W010 1TB 7200 RPM External Hard Drive Maxtor DiamondMax 10 6L250S0 250GB 7200 RPM Serial ATA150 Maxtor MaxLine III 7L300S0 300GB 7200 RPM Serial ATA150 Maxtor DiamondMax 10 6B300S0 300GB 7200 RPM Serial ATA150 Maxtor DiamondMax 10 6V320F0 320GB 7200 RPM SATA 3.0Gb/s Maxtor MaxLine II 5A300J0 300GB 5400 RPM IDE Ultra ATA133 Maxtor OneTouch II E01H300 300GB 7200 RPM External Hard Drive Maxtor OneTouch III F01G300 300GB 7200 RPM Внешний жесткий диск Maxtor MaxLine Pro 500 7H500F0 500GB 7200 RPM SATA 3.0Gb/s Maxtor DiamondMax 10 80GB 7200 RPM IDE Ultra ATA133 Maxtor Corporation NYSE: MXO is the world's third largest (as of December 2005) manufacturer of computer hard drives. Maxtor is focused on both the server and desktop markets, concentrating on drive capacity more than desktop drive speed. They started in 1982 as a specialized drive manufacturer, producing large, fast hard drives for servers and power users. In 1990, they entered the mass market with the purchase of the bankrupt MiniScribe; The transition has been tough, with the early products of this union (particularly the 7120 3.5 120MB drive) having a lot of work and design problems. Later the products managed to sell well despite the initial problems, and in 1996 they completely reworked their drive lines, presenting the DSP-based DiamondMax series, which is now regarded as some of the best ATA discs, quality wise. Maxtor sold the rights to its original XT series discs to a company called Sequel in the mid-1990s, thus exiting the SCSI cd market; around the same time, the SCSI version of the 7000 series of discs were also discontinued. In 2000, Maxtor acquired the quantum hard drive business. This move has made them bigger than their competitors (particularly Seagate Technology) and brought them back to the server-SCSI market. Maxtor, in recent years, like many other hard drive manufacturers, has expanded into the external hard drive market, such as maxtor One-Touch II's personal hard drive, which is marketed to be a convenient external storage for the home user. Maxtor initially made an effort to enter the 2.5 (laptop format) hard drive market, but in early 2005, the new management made the surprising decision to discontinue development in this area. Many saw this as a particularly peculiar step, as the market for such hard drives (mostly laptops and mp3 players) is already experiencing rapid growth, with no signs of slowing down in the foreseeable future. TiVo uses the Maxtor 40GB hard drive for local storage. In December 2005, Maxtor confirmed that it was to be acquired by its competitor Seagate. The value of the transaction is \$1.9 billion.No estimates of fees/No attempted fees Call now for a free quote: 1-800-717-8974.
